

The dimensions refer to the manufactured dimensions of goods in roll or bale form. Felt sheets are primarily manufactured with dimensions of 1200 x 600 mm. Depending on felt thickness and felt hardness (see DIN 61200), other lengths and manufactured widths may result for rolls and bales. As a guide, we have presented the widths and lengths of wool felts in accordance with DIN 61206 in table form.

¹⁾ The bale lengths are 8 – 60 metres, depending on thickness.

²⁾ See "SE004 Bulk density (in accordance with DIN 61200)" for tolerances

³⁾ Other thicknesses upon request

Hardness cards or other sample cards are available upon request.

Felt, naturally good!
